

High-Field Technology

Oasis™ - The image quality you need

We are adding the new Oasis™ 1.2T vertical magnet. This MRI offers:

- The most powerful whole body bore-less MR magnet providing hi-res images
- High Output Gradients
- The gradient amplifiers provide spatial resolution for short scan times
- Zenith RF Coil Technology
- The image quality is optimized through this technology allowing for seamless workflow and support for a range of clinical applications, such as:
 - RAPID™ Parallel Imaging
 - RADAR™ Motion Compensation Technique
 - TIGRE™ Fast Fat Suppressed 3D Gradient Echo
 - Uniform and reliable RF Fat Saturation
 - DiffusionWeighted Imaging
 - Balanced Steady-State Gradient Echo Sequences
 - FLUTE™ FluoroTriggering
 - TRAQ™ Time Resolved MRA
 - VASC™ Non Contrast MRA

Radiologists appreciate the Oasis uniform RF fat suppression, sub-millimeter in-plane resolution and thin slices – the hallmark of high-field imaging.

Open MRI is now clearly better
