

# Pediatric Imaging

## MRI Services to accommodate pediatric patients

Constant parent – child contact differentiates your pediatric MRI service with Oasis™. Physicians count on Oasis for high field image quality and even the smallest patients have the ideal MRI experience.

- Halo coil delivers quality imaging and an all around view
- Unlimited patient access increases efficiency
- Parents can talk to and reassure the child during exam
- RADAR motion free imaging eliminates repeat scans and improves image quality
- Fast scanning techniques keep study time minimal
- OPEN architecture allows pediatric patient security and comfort, sometimes eliminating the need for sedation or anesthesia
